

When a player plays Medal of Honor Warfighter, he/she may experience game crashes or game freezes. This is due to the game using low performance settings in order to avoid lagging players out during the online phases of gameplay. However, this can make it harder for players who are trying to play with lower-end computers. Fortunately, Medal of Honor Warfighter Fixer 2.0.5 will fix that issue by adjusting system settings for better performance and stability in these instances! Download now and get your fix! Medal of Honor Warfighter Fixer 2.0.5 offers the ability to adjust graphics settings in Medal of Honor Warfighter in order to improve performance and stability. You may specify which graphics setting you would like Medal of Honor Warfighter Fixer 2.0.5 to be applied to the game via the included parameters within the exe file - i.e. Always at Low, Always at Medium, or Always at High. This allows players who are running low-end computers or who are experiencing technical troubles in Medal of Honor Warfighter to better select settings through these parameters instead of having no choice but to adjust graphics settings using an external tweaking tool. Medal of Honor Warfighter Fixer 2.0.5 offers other features such as: - Force FPS to 30+ (45+ recommended) (DirectX 10 only) - Disable all Intro videos and logs. - Disable health bar and skull counter while in multiplayer mode (DirectX 10 only) This simple tool aims to create a more stable and enjoyable online gameplay experience for Medal of Honor Warfighter players, and is the final solution for the lag issues that could occur when playing online because of settings used in Medal of Honor Warfighter's settings menu. - Download & Install - Extract .rar archive - Launch Fixer exe file - Make sure to have Origin.exe running in the background while using this tool Medal of Honor Warfighter Fixer 2.0.5 is easy to use! Simply run Medal of Honor Warfighter Fixer 2.0.5, then run Medal of Honor Warfighter - it will automatically be adjusted to Level 3 settings based on your specifications chosen through Medal of Honor Warfighter Fixer 2.0.5! Your settings are saved so you don't have to adjust them every time you want to play online! Medal of Honor Warfighter Fixer 2.0.5 is available for download at its official page on FileFront, which can be found here. Medal of Honor Warfighter Fixer 2.0.5 can also be downloaded directly from its official site (final link will be posted soon), the site address is Medalofhonorwarfighterfixer.com. Fixer allows players to adjust all graphics settings in Warfighter to ensure that better performance and stability occurs during online gameplay. By using different graphics settings, players may optimize their system for optimum gameplay - whether it be playing on an older machine or for those who need it, running on Windows Vista, 7 or 8.
