### About This Game

Where is the line between life and death? How far can human science go trying to understand this? Take part in the great battle to rescue humanity and find out what's happening! The human race is in danger again. This time scientists could not cope the imminent threat and became monsters themselves. Crowds of zombie people filled the secret research base. The dreadful contagion is about to spread earth wide. Use the last chance to save the humanity from total annihilation!

Find the answer to the main question - what caused the catastrophe? Who knows, maybe on the final stage you'll face something terrible?..

Try your monster fighting skills in two additional game modes - Survive and Gun Stand. Only these modes will really show how good you've become.

- Fight your way through contaminated hordes
- Use 10 types of weapons
- Improve the character's skills
- Upgrade available arms with the money earned
- About 1,000 zombies on each map, showing up to 100 zombies simultaneously on one playing screen

- 
- 3 game modes: Campaign, Survive and Gun Stand
  - Full-on-action male or female character
  - Character upgrade facility
  - 9 upgradeable weapons of mass destruction
  - Red or Green blood selection
  - Highly imaginative selection of zombies
  - Reactive music which helps to drive the action
  - Useful gadgets - flash lights, medkits, battle drones and radar.

● Cover

*An AdventureWeek.com mini-dungeon by Stephen Yeardeley*

**For 4-5 PCs of Level 6-7**

*"When revenge calls, act as the tiger... with hard-favored rage!"*

In the sub-continent, some extreme religious cults have taken to eradicating the essentially-neutral local werewolves. One such band, the law-focused Light-from-Darkness, developed a precise ritual that withdrew a werewolves' essence to its exact last drop. When one werewolves somehow resisted the ritual three times, the temple's followers became unsure what to do, so did nothing. This gave Kaanne Tikeri - a rakshasa - an opportunity to learn about his captors even as they began to realize their mistake. When Tikeri's chance came, he escaped his chains, assumed various temple members' forms, and slaughtered them all. Now he rests and ponders the fate of those nearest and dearest to the former clergy, for revenge calls...

The party's been asked to support a local temple's attempt to eradicate dangerous lycanthropes. The welcome from locals is warm, but the PCs are told that the shrine has been closed for a week, "for full moon cleansing".

Many temple doors are locked. Table 1 highlights where the key is for each door, along with the Open Locks and Break DCs for each one:

10/10, best flying through the air 300 times and throwing controller simulator 2017.. PROS:

- + Really fun and simplistic but challenging gameplay
- + Really charming and interesting story given the minimalistic style
- + Content is well worth the price
- + Progression! The game introduces new mechanics over time to keep levels from feeling stale
- + SUSAN let me in on a little secret... no telling!

CONS:

- Controls feel a bit unpredictable sometimes
- Music can be a bit painful, it would be nice to have an option to adjust music/sound seperately
- Score is a little buggy

Verdict:

Cheap Golf is well worth the small price the developer-- ahem, SUSAN, is offering it for. It's a hybrid between a mini-golf/puzzle/reflex game, so I'd recommend you are in to at least one of these genres, but I think most people would enjoy playing this. It's challenging but fair, and a lot of fun. 8/10

EDIT:

In response to the developer, certain levels would have par scores of 0 (despite the actual level displaying something different). Certain levels also didn't properly calculate turns (I don't remember the exact name, but there was one with bumpers I did with one shot multiple times and it always said it took me two hits).. I don't recommend this game. The game has nice visuals in the sense that simplicity and neon like colors give it tron'esque feel to it but for some reason that very graphics heats up my laptop a "bit" despite what requirements say.

I dislike the "hidden area" gimmick in the sense that while hidden areas are always nice... but they're not really hidden when they are your main objective and in plain sight... also going through barely visible and overlapping "hidden" platforms was unpleasant.

All in all if have excellent eyesight and like some tron like adventure give it a go.

I will go get my refund as my sight is not as good as to tolerate overlapping ghost platforms/areas (also I do not intend on cooling my room down just so i can play the damn game without it shutting my laptop due to overheating...).. BLOOD BOWL! If you like blood bowl, then totally worth it. Custom team creation is fun for friendly matches and gimmick teams. The Open Mic feature is genuinely the best thing to happen to Beat Hazard.

I love the game, and to be able to actually use Spotify is a godsend, thank you so much for this feature Cold Beam!

Time to get through my whole Spotify library! Highly recommended, especially with the visuals turned up to the max % where everything is a pulsing rainbow-white screen, 10/10. I consider myself a pretty accomplished reader, but I don't normally mix

reading and gaming. That all changed with Snail Trek - Intershellar. This game's story is quite humorous, but it doesn't come on too strong. The author also cleverly worked some puzzles in between the paragraphs to keep players on their toes. I can't wait to see what happens next for our intrepid explorers!. Menu bugs and issues stopped me from really giving this game a shot. If you haven't played CoH1 in a while, it's worth re-installing just to check out this mod. It reworks the game to be much more infantry based, and artillery pieces (as opposed to off map) and mortars play a way bigger part. Tanks become these rare (and very slow) powerhouses that you really need to capitalize on with mixed tactics. At the same time, though, a lot of new passive elements like officer buffs and the 'retreat to closest company outpost' button makes it so you're only micromanaging the fun stuff. If you thought the design of the British in CoH:OF was kind of weird, or even if you loved it, this is a fantastic mod. I just wish there were more maps with established trench lines.. Wonderful sequel to Beat Hazard. Active creator, listens to community. Supports open mic (spotify, youtube, pandora, etc.)

9.5/10

Awesome game! as of writing this it's still in early access but on the right track to be a cult classic. can't wait to see how this game grows.. The Crystals and Curses is being filled

A thousand girls, a thousand thrills

A million ways to spend your time

When we get back, I'll drop a line \u2b50\u2b50\u2b50\u2b50. If I like your game, I will play it...Great game...I played it 14 hours later, I'll play it again.....Strategy\Unit placement + tower defenseish... And they didn't let me take that furry sweetheart away from that cage? Seriously? I'm shattered.. the first association i get from motorama is to the old street rods. same age, same look-and-feel, same cars...

visuals and music are nothing to write home about but are appropriate enough. driving model is arcade and cars are mostly unmanageable when spinning out but that actually fits with the 50s racing theme.

now for the bad parts:

- ai cars have no clipping, just going through the traffic cars that collide readily enough with you
- driving ai sucks, it does spin out randomly that helps overtaking them but it does not feel like something that should be happening. plus, ai cars have unfair advantages like hyperspeed, blowing past your upgraded car with ease
- upgrading cards feels random. just as one example - a car with 55% speed is actually slower than one with 40% speed
- progress is badly managed. major amounts of moneygrinding is required to progress and this is always a bad sign

racing through the game takes about 2-3 hours, unfortunately grinding the cash for upgrades takes a lot longer and is simply boring.

i really want to recommend it but in its current form, i cannot.

if this would be a beta, i would be stoked to see how it turns out. but as a final game - skip.

. I hope you're not epileptic, and I hope you're ready to restart your computer after the fun fun of downloading a 9 GB program only to start it up, have it freeze at the main screen, and then start rapidly flashing green. Trying to close it won't work. Shutting down Steam won't work. You'll have to either have a second monitor in order to log out (how I did it), or restart your PC.

So I went to the discussion part of the store page, in order to file a bug report, and found there are already 144 bug/glitch discussions, many of them unanswered. Reading the discussion board itself, I found that apparently there's little to do in the game anyway, unless you're dropping cash.

Still, I figured, let's try again.

So I restarted the game, and this time it managed to load, while still flickering this green and black neon color. I got to the main screen to look for the settings option, but I had to go through a tutorial first, and agree to the license, at which point my eyeballs were melting from the flashing, flickering neon green and black. FINALLY, I managed to cut the tutorial short and went to the settings screen. There are no graphics options. You cannot change resolution, color depth, nothing.

I would not recommend this game if they gave me a million "Atom" points.

For the love of Gort, my vision is still flickering pink.

FUN!
